Bamaco, Inc Disaster Response (and other companies) (1977-Present)

Mr. Mitchell has been involved in disaster recovery and debris removal since ice storms of 1977. His first Corp project was Orange Beach, Gulf Shores and Mobile, Alabama following Hurricane Frederick. In this project Mr. Mitchell was a subcontractor to the United States Army Corps of Engineers. The primary task during these three projects was debris removal. His work in the disaster response field has continued and expanded throughout the last 30 plus years.

Robert Mitchell
HAZWOPER CERTIFIED

BAMACO, Inc. has been involved in the demolition market both in response to natural or man-made disasters and in the more standard real estate construction and development markets. He has demolished thousands of homes, commercial properties and industrial facilities throughout the country.

Asbestos Abatement

Mr. Mitchell has been certified as an asbestos abatement contractor. He has demolished literally thousands of homes and commercial buildings which have contained or been suspected of containing asbestos materials. Wet demolition, removal or encapsulating of ACM and glovebagging are some of the procedures he has used to complete these projects in a safe, timely and cost-effective manner.

UST Removal

Mr. Mitchell has, also, been certified as a tank removal contractor. The safe removal of underground tanks that contain a wide variety of toxic and hazardous materials is a meticulous process. Any deviation from the rigorous attention to details can cause severe environmental damage.

Classes Trained

Mr. Mitchell also teaches classes on the various methods used to meet and exceed the FEMA requirements. This class covers every element needed to complete any debris removal project .
